25X1A [REDACTED] Printing Job: At the Morning Meeting today Colonel
25X1A White briefed on the events of last week on the proposed PSD printing
25X1A of the [REDACTED] report. His recital ended with his approval on 7 January
of our printing 4,000 additional copies for official distribution and of
our declining to print those for public sale. I added the subsequent
development that the [REDACTED] intended to ask the public printer
to handle even the additional 4,000 for official use. The Director
acknowledged his understanding of the potential problem we could have
with the public printer and the Joint Congressional Committee on Printing.
He then stated that any further requirements of the [REDACTED] should
be reviewed and validated at a senior Agency level. I passed this to
Mr. Blake.

Equal Employment Opportunity Legislation: At the Morning
Meeting today Mr. Maury reported on his discussion with Senator
Dominick concerning the EEO legislation. Senator Dominick was completely
sympathetic to the Agency problem and position and indicated that he was
himself opposed to the bill. He noted for that reason he felt that he could
not successfully represent the Agency's position and suggested that
Senator Williams or Senator Javits should be contacted. He set up an
appointment for Mr. Maury to see Senator Javits today. I briefed the DD/S
Noon Meeting and also passed this information to [REDACTED]

25X1A

VIP: Colonel White mentioned at the Morning Meeting today the
report of the initial six months experience he had received from VIP. He
suggested that this be given some publicity in order to encourage additional
employees to join. The Director did not specifically approve such publicity
noting that news of that type would likely spread very rapidly within the
Agency. I discussed this item with [REDACTED] who advised me that the
Board of Trustees had instructed [REDACTED] to draft some sort of a
notification which could be discussed at the next Board meeting. The sense
of the Board was one of great caution in sharing this information in order to
ensure that it is not misinterpreted by employees.
